Career Objectives

Currently, I'm working as a senior software engineer in Sheraspace Limited and also working as a cyber security trainer in Cyber Bangla Organization. I am a quick learner. In the working place, my role is to maintain a team of 5 people and handle the architecture of the system. I have to perform the deployment of the code and perform the smoke testing of the system. Now I am seeking a challenging position in a professional environment where I could add my knowledge and skills for the better productivity of the organization.
